

## LED Driver 4-7W Constant Current 300mA AC 85-265V Output 12-26V Power Supply LED Ceiling Lamp Rectifier Transformer

- 
- Item Type : Lighting Transformers
  - Certification : CCC
  - Material : Plastic & PCB
  - Input Voltage : AC 85V~277V
  - Features : Constant Current, Isolated, high PF, high efficiency, full power
  - Output Signal : DC
  - Input Signal : AC
  - Output Voltage : DC 12V~28V
  - Weight :33g
  - Output Current : 300mA±5%
  - Compatible Power : 4W~7W
  - LED Type : Support 4-7pcs 1W leds
  - Dimension :70 x 34 x 26mm
  - PF : 95%
  - Efficiency : 90%
- 
- High quality,high power factor,low temperature rise,high efficiency.
  - It has no noise, no flicker, over-current protection and short circuit protection and comes with terminal, easy to install.
  - Note: Better for ww/cw double-colored light source, may not work well for single-colored light source.
  - Make sure the maximum wattage of the strip light does not exceed the max output power of the LED driver.
  - Mainly applicable to LED decorative lighting, building lighting, stage lighting, LED display and theatre.
