**DVD/Receiver/HDTV Fiber Optic Digital Audio Cable Any Components than supporttoslink cables(fiber optic cables) to a Digital Audio receiver / TV through fiber optic input cable. PS2 Fiber Optic Digital Audio Cable Fiber Optics. This Fiber Optic Cable Provides a one-box solution for exceptional-quality audio connections to your divices. Offers an ideal Audio solution for Dolby Digital and DTS surround**

sound.

This Fiber Optic Cable for use CD, DACs, SPDIF and Dolby Digital audio applications. Graded index optical Fiber greatly reduces jitter for enhanced clarity and definition. Uniquely designed pressure connection keeps fiber in perfect alignment with components. Spring-loaded connector keeps fiber in optical alignment for maximum data transfer. If you're serious about your home theatre system, you know the importance of using quality sound cables. When it comes to digital audio, there's nothing better than Toslink for maximum audio clarity and resolution. With no distortion or signal interference, Toslink gets the most out of your digital audio gear for rich, detailed sound, even at extreme volumes. Thinner and more flexible than our regular Toslink cables, these cables are perfect for installations where space is tight. The flexible PVC jacket construction lets you bend the cable into any position you need while maintaining optimum fiber alignment so the sound quality doesn't drop.
