

## ox-g012 powerful 100mw green laser pointer pen lazer green pen with star cap

### Detailed description

green laser pointer

features:

This high quality laser pointer incorporates the latest technology in green laser optics and Microelectronise. Use the laser pointer to point at any desired objectives, project screens, or video monitors, presentations, museum and tour guides, point in the stars, and inspection. The Laser Pointer has a limited 30 day warranty, if a failure occurs, do not attempt to open the laser unit. To do so , the warranty will be voided.

instruction:

press the button switch to turn the laser.

release the switch to turn it off.

insert batteries:

unscrew the end cap, insert the batteries with the positive pole facing up and screw the cap.

Laser type: Visible laser diode

Wavelength: 532nm

**output power: 100mw**

Beam distance: more than 5000 meters

battery: AAA x 2 not included

Material: Metal

heating time under 2-3 minutes

warning:

**DO NOT LOOK AT THE OPENING OF THE LASER BEAM.**

Description: Green laser dot er

size: 156 \* 13.5 \* 13.5mm

OXLasers provides wholesale pointers, 532nm green laser pointer, 405nm blue laser pointer (violet blue laser pointer and violet laser pointer), 650-660nm red laser pointer, high-power laser pointers, pen-shaped laser pointer and laser with Flashlight shape (5mw-600mw), our laser indicators over 100mw can burn mtaches over 200mw can light cigarettes very easily.
